

The main, in a broad sense, development path of the International consortium «Clean Innovative Technologies» is associated, first of all, with the problems of ensuring the environmental safety of human life.

The soonest achievement of this goal can be achieved only by combining the efforts of companies of various specializations in the development, design and «turnkey» construction of environmentally friendly facilities for various purposes, and primarily aimed at:

- ✓ *cleaning contaminated hard surfaces of various configurations, water and air;*
- ✓ *disposal of solid, liquid and gaseous wastes of various origins, including 1st and 2nd hazard classes;*
- ✓ *solution to various problems oil and gas production and refining in transport and housing and communal services;*

The entire structure and activities of the International consortium «Clean Innovative Technologies» is built in such a way that all Consortium Partners create the most comfortable conditions for promoting their business and products, including finding for them Customers and related partners in the production, design and construction sectors, providing financing and lobbying for their interests etc. and etc.

CONSORTIUM
«CLEAN INNOVATIVE TECHNOLOGIES»

THIS:

- ✓ *information platform for reliable, complementary each other's Partners;*
- ✓ *Partners, Customers and Consultants interested in your products / services;*
- ✓ *selection of Partners for joint promotion of projects and participation in competitive procurement;*
- ✓ *the possibility of concluding contracts with minimal marketing costs;*
- ✓ *other advantageous offers.*

BASIC AREAS
OF TODAY ACTIVITY

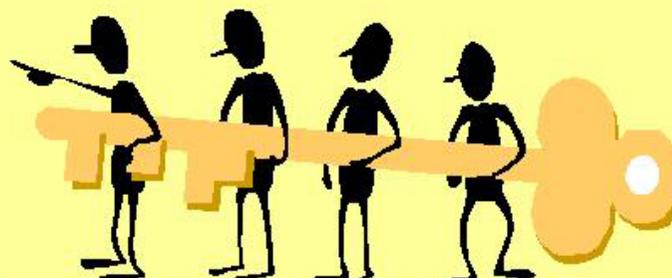

- ✓ *treatment (cleaning and washing from any contaminants, degassing and drying after washing, anti-dust and anti-icing protection of various vehicles, etc.) of **hard surfaces** of various configurations;*
- ✓ *processing of solid, liquid and gaseous **waste** of various origin, including Ist and IInd hazard classes (industrial, municipal, agricultural, medical, etc.);*
- ✓ *purification of water, air, soil, sludge, etc .;*
- ✓ *small tonnage **processing** of associated petroleum and natural **gases** to **produce marketable** petroleum and petrochemical **products**;*
- ✓ *highly reliable **non-destructive testing** of critical products;*
- ✓ *automation of technological **processes**.*

EACH
PARTNER OF THE CONSORTIUM:

- ✓ *striving to create the most comfortable working environment for itself, it recommends to the Consortium its friends and business partners. Those, in turn, offer their friends, thus creating a friendly community of people united by common goals;*
- ✓ *having its regular and reliable customers, gets an exceptional opportunity to realize these connections and acquaintances including and in non-core business areas;*
- ✓ *in order to implement specific projects has the opportunity as soon as possible to assemble a multi-professional group of Partners;*
- ✓ *who gave recommendations to 6 other Partners of the Consortium and, thus, created his own «honeycomb», gets a place in the Committee of that «professional platform to which his specialization corresponds.*

The members of the Committees of each «professional platform» choose their own Chairmen, who, in turn, get a seat on the Supervisory Board of the Consortium.

** the following page is an illustration,
which reflects a philosophy of interaction
partners within the framework of the Consortium «CIT»*

Coming together is a beginning.

Keeping together is progress.

Working together is success.

Henry Ford
